BC Parks Statistics Report 2010/11

Summary

BC Parks is taking a new approach for 2010/11 which provides park related information in two separate reports. The 10/11 BC Parks' Statistics Report contains detailed park attendance and revenue tables and graphs, satisfaction survey information and financial tables. Much of this material was previously in our "BC Parks' Year End" reports.

The BC Parks Annual Report contains information on the full breadth of BC Parks activities. Material related to natural and cultural heritage, management planning, and changes to the protected land system have been moved into this new report. The Annual Report will expand on this information as well as on the visitor statistics contained in this report. It tells BC Parks' success stories, recognizes the work done by staff and our many partners, showcases key projects and facility investments, and also discusses challenges and lessons learned.

We encourage feedback on both format and content so that we can continue to improve our reporting and make these documents as useful as possible for regions, executive and others who are interested in BC Parks' performance.

Attendance:

Overall park attendance declined by 2.9% in 2010/11. Attendance in 2009/10 was high for all user groups due largely to exceptional summer weather in most parts of the province. In 2010/11, weather returned to more normal patterns and attendance, particularly for day use, dropped from the 2009 peak. In addition, higher camping fees in 2010 impacted on attendance in some campgrounds and nearby day use areas.

Day use attendance declined by 2.3% overall, with decreases showing in the Kootenay, Lower Mainland, Peace, Skeena and Vancouver Island regions. For many parks, this represents a return to normal attendance levels. However, the Cariboo, Okanagan and Omineca regions showed an increase in day use visitation during 2010/11.

Camping attendance declined somewhat in every region, with an overall decrease of 6.4%. The increase in camping fees implemented for 2010/11 affected attendance across the province. Poor weather, increased fuel costs, the strong Canadian dollar and the U.S. economic recession also led to a decline in US visitors. In particular, there was a significant drop in yacht operators travelling up from Seattle and visiting parks such as Desolation Sound and Princess Louisa Marine Park. Marine attendance, in general, is strongly affected by weather (dropped by 9.3% overall). In addition, campfire bans contributed to decreased attendance in the Thompson and Okanagan region campgrounds. The Cariboo region was also impacted by late snow melt which delayed some campground openings.

Parks which demonstrated a significant change to visitation are noted on pages 14 to 17 of this report.

Revenues:

Camping fees in 2010/11 increased by \$1 to \$6 per night in order to address higher operating costs and properly recognize campground service levels, increasing camping revenue by \$930,000. There were some declines in day use revenues so total revenues from recreation user fees increased by \$845,000 (5.6%). The Okanagan region saw a dramatic increase in total revenue at nearly \$500,000 (approximately 16%). Revenue in the Omenica region also showed a strong increase of 15% although the dollar value was much lower at about \$74,000. Revenue in the Thompson, Kootenay, Vancouver Island and Lower Mainland regions were all up between 2 - 5% due to the higher camping fees. Revenues declined in the Peace, Skeena and Cariboo regions. It is likely that poor weather combined with fee increases suppressed revenues in those regions.

Park Use Permit revenues remained fairly flat overall but with non-ski permits dropping to more normal levels and ski hill permits showing a large increase, reflecting a strong ski season in 2010/11.

Recoveries:

Recoveries remained stable at around \$350,000, with the majority of the money being earned through fees (Tatshenshini river rafting), film supervision recoveries and transfers from the National Parks Establishment Account.

BC Parks Budget:

Overall, BC Parks budget expenditures (operating and capital dollars) increased from \$46.1 million to 48.7 million. The \$2.6 million increase in total BC Parks budget expenditures is largely explained by the \$2.2 million increase in compensation payments required to buy out timber and mineral rights in new parks and conservancies. Additional increases are from growing amortization payments due to investments in facilities (\$0.5 million) and a small increase in salary and travel costs (\$0.3 million) - although these operational expenditures were largely off-set by a \$0.6 million decrease in deficiency payments to PFOs.

Operating Expenditures:

Overall, BC Parks operating expenditures increased slightly with the majority of the increase due to higher amortization payments required because of investments in facilities. Deficiency payments declined by about \$600,000 and retained fees increased by \$430,000 because of the increase in camping fees.

Capital Expenditures:

Compensation expenditures increased significantly due to the number of new park designations and additions. Capital investment in park facilities declined by about \$400,000 in 2010/11 to just over \$10 million. However, the need for water system upgrades under the new drinking water regulations (implemented in 2003) has decreased. Therefore more funding was available for other projects such as toilet building refurbishment and upgrades.

Satisfaction:

Visitor satisfaction ratings rose slightly to meet the target of 80% (index scores rated excellent or above average) in 09/10. The change in survey methodology in 09/10 lead to a dip in this indicator which may have been due to the fact that it received a lower response rate, a shorter survey period, and an increased likelihood for unsatisfied campers to fill out an online survey were brought about by this change. These factors were diminished in the 2010/11 survey. Overall, campground visitors remained highly satisfied with the cleanliness of the grounds, sense of security and condition of facilities. The service that received the most improved ratings was the control of noise in parks (up 7%).

Significant Variances in Camping and Day Use Attendance

Parks with the greatest changes in attendance

This section highlights those parks which show the greatest increases or decreases in attendance. For day use, a greater than 30% and greater than 5,000 total attendance variance criteria is used. For camping the criteria used to highlight critical changes is 10% and greater than 1,000 in total attendance. The appendices provide individual variances in attendance and revenue for all parks.

BC Parks Statistics Report 2010/11

2010 BC Parks Visitor Satisfaction Survey

The Visitor Satisfaction Survey assesses the ministry's effectiveness in achieving client satisfaction with protected areas and campground facilities and services. Key parks are surveyed on a rotational basis, every 4 years. Surveys are usually undertaken yearly from May 15 to the first week of September. BC Parks overall visitor satisfaction rating is based on an index of visitor responses to questions about five services: cleanliness of restrooms; cleanliness of grounds; sense of security; control of noise; and, condition of facilities.

Park Facility Operator performance continues to remain at a high level. Campground visitors are highly satisfied with the cleanliness of the grounds (over 90% of visitors rated this as excellent or above average in 2010/11) and sense of security (about 85% excellent or above average). The lowest ratings for the past 2 years were given to the cleanliness of restrooms (about 70% excellent or above average).

Note: The surveys are based on sound statistical principles, design and methodology. All ratings are based on responses of "excellent" and "above average" to the survey questions. Key parks are surveyed on a rotational basis, every 4 years. Surveys are usually undertaken yearly from May 15 to the first week of September. The Visitor Satisfaction Index is a provincial average based on the overall rating of campers and park visitors in the following five categories: cleanliness of restrooms, cleanliness of grounds, condition of facilities, sense of security, and control of noise.
